DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Robert Brewer (USP US 6,677,799). Brewer (see figure 2) discloses a delay circuit (209 and 208) at the input with an output generating circuit (201 and 202) and an output current generating circuit (207 and 210) generating a current based on the supply.

Response to Arguments

3. Applicant's arguments filed 11-8-04 have been fully considered but they are not persuasive. Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.
